

HEEA

Highway Electrical Association

210 – Working in the vicinity of DNO / IDNO equipment including G39

Duration:	1 day
Suitable for:	<p>Managers, clients, those in overseeing organisations and contractors in public lighting, signs, traffic signals and/or other Highway Electrical specialist areas who may enter highway electrical equipment containing a Distribution Network Operator or Independent Distribution Network Operator supply</p> <p>For those who do not work on or near DNO or IDNO cut-outs but require an understanding of Working in the vicinity of DNO / IDNO equipment including G39, to discharge their responsibilities appropriately (e.g. managers, client and overseeing organisations), then course 210.1 may be more suitable - this covers the same topics but does not have a practical assessment. Please discuss your needs with HEA Training</p>
Course aim:	<p>This course aims to provide employees working within the Highway Electrical Sector with the appropriate safety knowledge and practical key skills required for work in the vicinity of DNO or IDNO equipment. This includes overhead power lines and the removal and replacement of DNO or IDNO cut-out fuse carriers in a safe and responsible manner and to comply with the responsibilities under organisation and legislative policies</p>
Prerequisites:	<p>In order to gain maximum benefit and learning outcomes from this course there are a number of training modules, which are required before attending. A complete list of pre-course requirements are available from the Training Specification located in the Download section of the HERS web site at https://thehea.org.uk/hers-hesa/hers-resources/ - Category: HERS Handbook and Training Specification</p> <p>** Confirmation will be required that the prerequisites have been achieved **</p> <p>*** In date Certificated Evidence must be provided for course 214 Safe Isolation before attending this course ***</p> <p>Where consecutive 214 and 210 courses are delivered determination of successful achievement of course 214 will be made by the course Trainer and Learner advised.</p> <p>Candidates must bring their supplied PPE and test equipment for the practical assessment.</p>
Course Objectives:	<p>On completion of the course Learners will be able to:</p> <ul style="list-style-type: none">• State the associated Hazards and Risks• State the acceptable clearances between highway electrical columns, posts or poles and overhead lines• State the different methods of providing a mains supply• Describe the responsibilities regarding commissioning, maintenance, repair and emergency attention• State the method of work to be adopted when working in the vicinity of live conductors• List the PPE requirements• Demonstrate the ability to correctly remove and replace a cut-out fuse carrier for isolation purposes and fuse replacement• Carry out a polarity check
What to do now:	<p>Further details and booking may be made from the website: https://thehea.org.uk/hea-specialist-training/ Or by contacting the HEA (Highway Electrical Association) Office, on 01903 705140</p>

Course Programme
